2. Secara default semua pickinglist (west dan east) ditampilkan

Picking List

The screenshot shows the TOM (Transport Order Management) web application interface. The main header displays the TOM logo and the user name 'Denny Sudjianto Wijono'. The left sidebar contains navigation links: HOME > TRANSPORT, Picking List, Order, Execution, Monitoring, Summary, Transportation Seal, Loading Unloading History, Driver Data, Vehicle Data, and Safety & Security Data. The main content area is titled 'Transport > Picking List > List'. It features a 'Total Unit For' dropdown, an 'Export' button, and a 'Custom Report' button. Below these are search filters for STO NUMBER (Type STO No), ZONE, WEEK (48), YEAR (2018), SENDER, RECEIVER, and UPLOADED BY. A 'Search' button and a 'Reset' button are at the bottom of the filter section. An 'Export' dialog box is open in the center, with two radio button options: 'RAW DATA' and 'PICKING LIST FORM'. A red arrow points from the 'PICKING LIST FORM' option to the explanatory text below.

Note

1. Raw Data: data seminggu dalam 1 sheet yang sama & STO tertulis di tiap baris
2. Picking List Form: data seminggu terpisah menjadi 7 sheet dengan nama masing-masing hari & STO tertulis di baris pertama
